

Group Presentation

Süreyya, Sophie, Emre

Project Development Plan

1. Concept Phase (1–2 Weeks)

- Define project goals and research question; Determine scope and focus (e.g., climate & food security)
- Identify potential data sources; Sketch initial visualization and use case ideas

2. Data Phase (2–3 Weeks)

- Collect, clean, and unify datasets; Explore trends and correlations
- Select key variables (e.g., yield, prices, deaths); Choose cities or regions for comparison

3. Design Phase (2 Weeks)

- Create visualization concepts; Plan interaction flow and visual hierarchy
- Define technical architecture (data pipeline, UI layout)

Project Development Plan

4. Implementation Phase (4–5 Weeks)

- Develop core visualizations; Add interactivity (filters, timeline, zoom)
- Integrate datasets step by step; Build comparison view between regions

5. Testing & Optimization (2 Weeks)

- Test usability and functionality; Refine visuals, performance, and responsiveness
- Prepare documentation

6. Finalization & Presentation (1 Week)

- Prepare final report and presentation; Create interactive demo on the Powerwall
- Present results and findings

Why on the Powerwall / in VR?

- Immersive Exploration: Explore climate patterns across cities and time in a spatial, engaging environment.
- Scale & Detail: Seamless zoom from global overview to local city(?) detail.
- Collaborative Analysis: Multiple users can explore data and discuss insights together.
- Spatial Understanding: 3D context enhances comprehension of complex relations.
- Impactful Storytelling: Makes climate change and its consequences visually tangible and memorable.

Use Cases

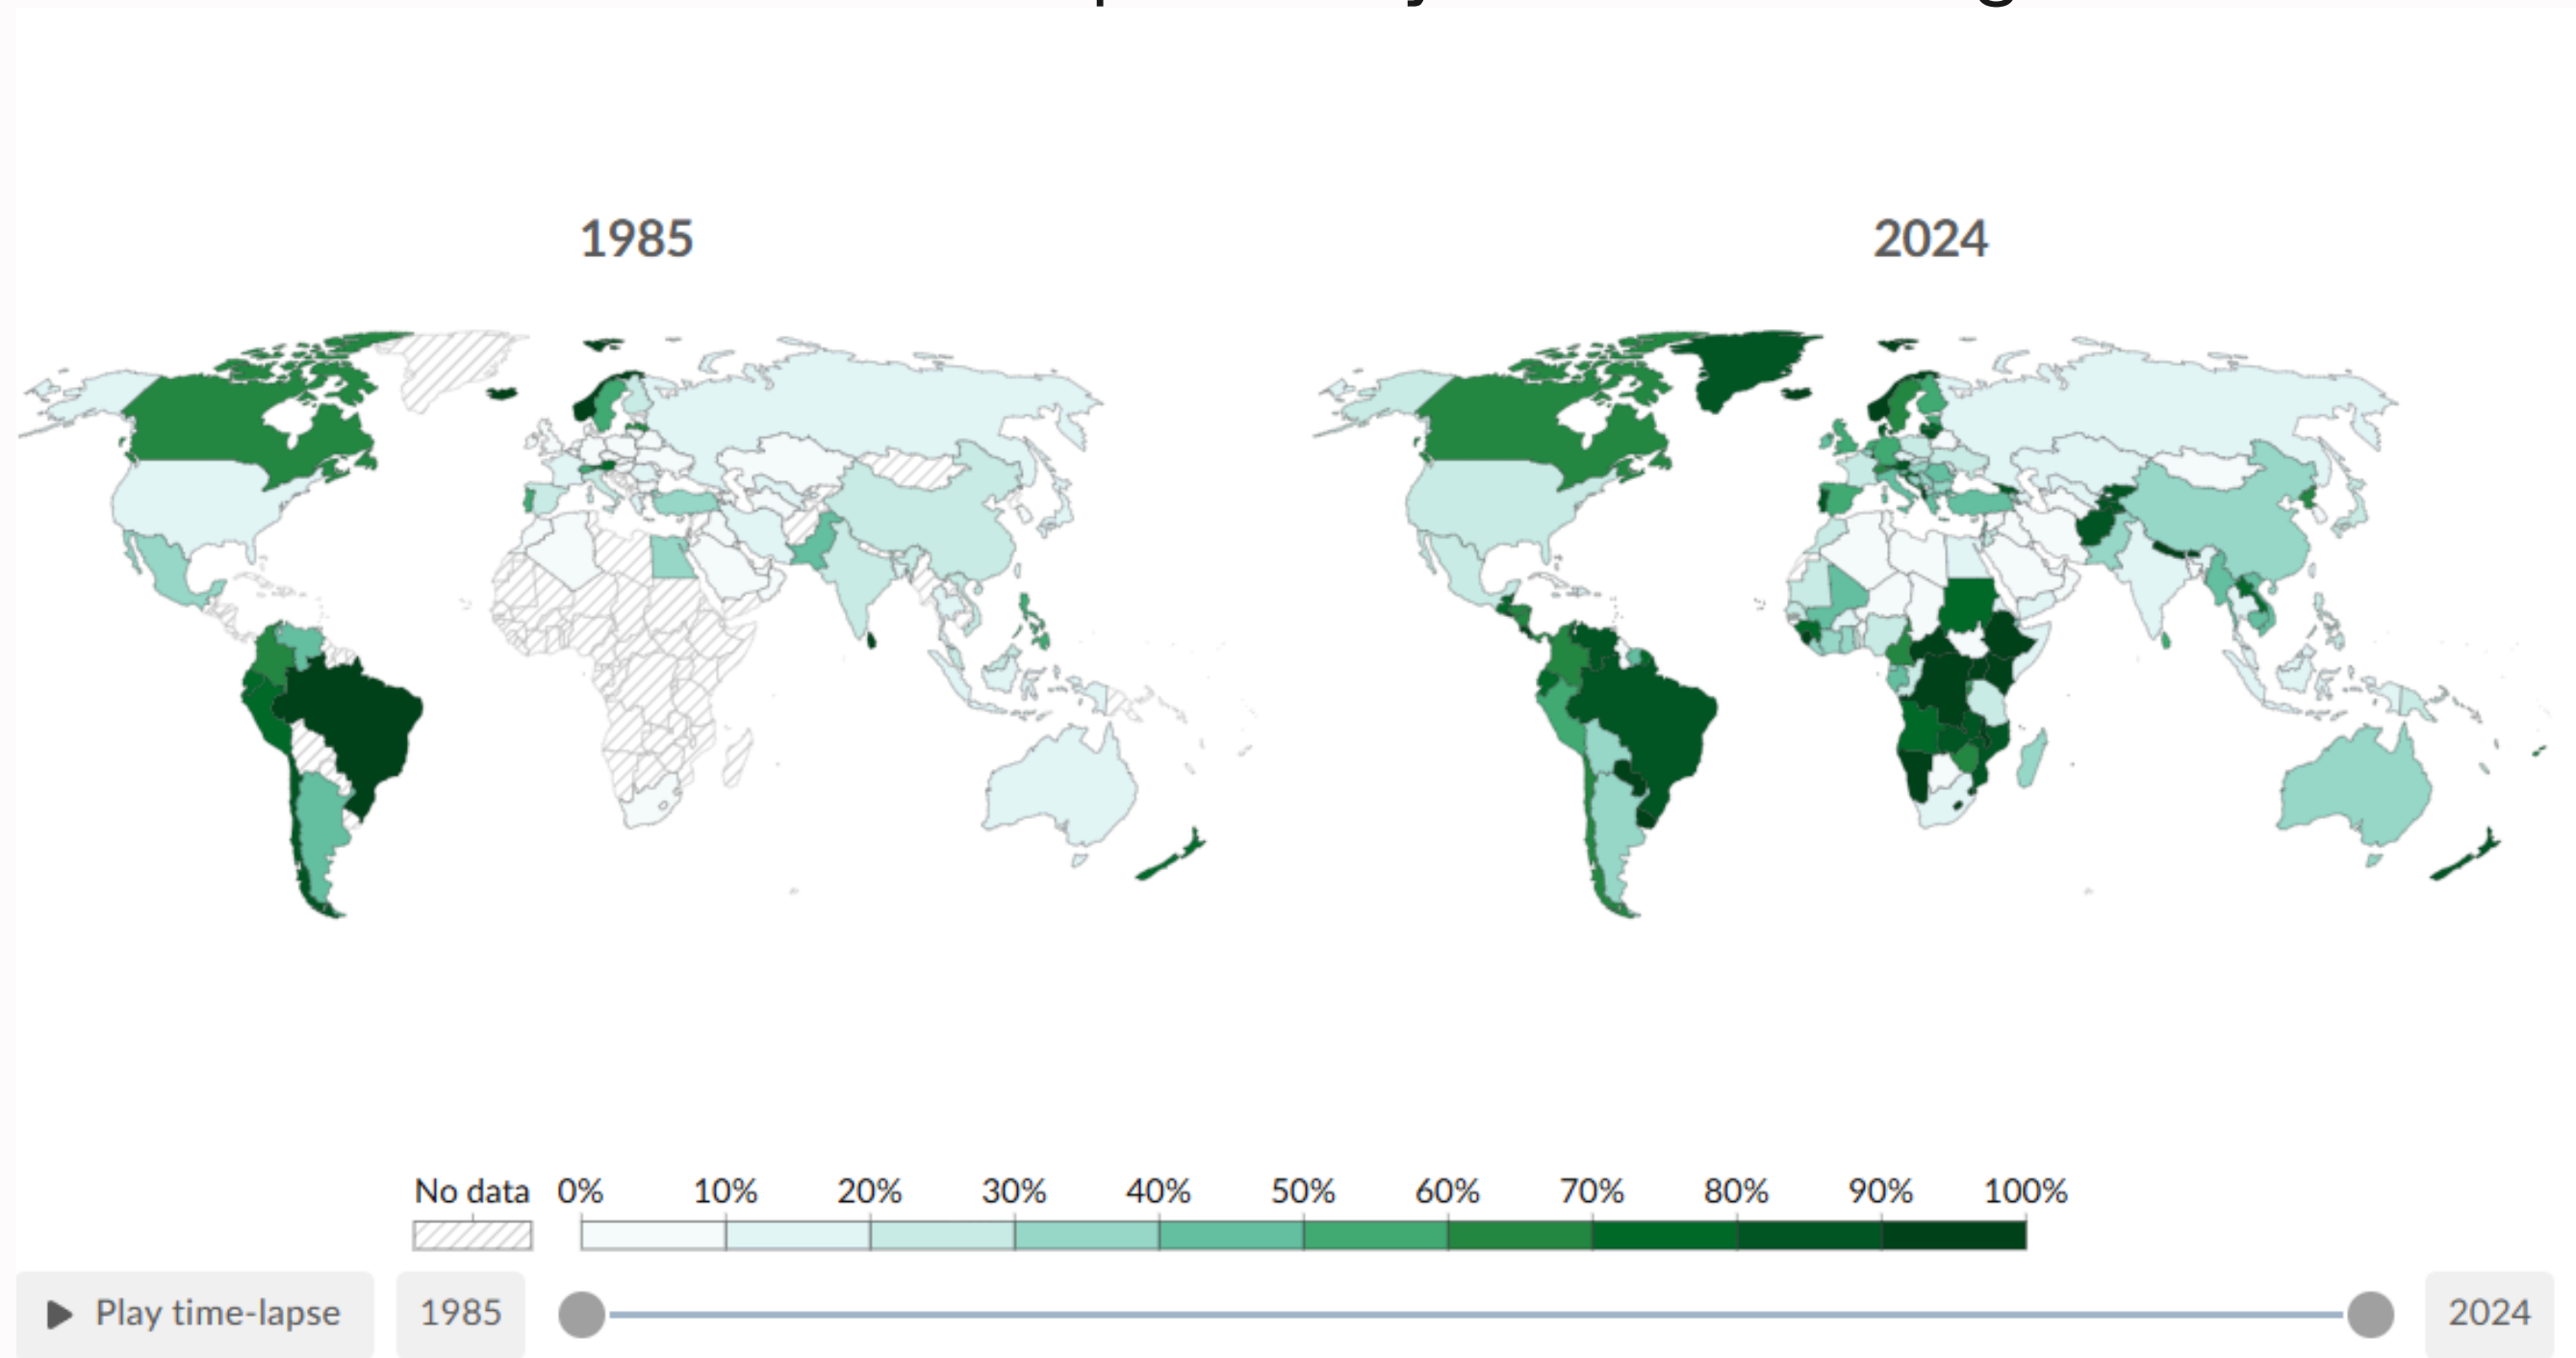

Climate Variable	Combined With	Insights
Drought index	Crop Yield/ Food Prices	Food security, economic stress
Wildfires	PM2.5+Hospital Data	Air pollution - health linkage
Renewable Share	CO2 Intensity+Prices	Energy transition dynamics

- Use this as starting point → story telling
- User is able to analyse further + combine datasets by himself

Which Visualizations?

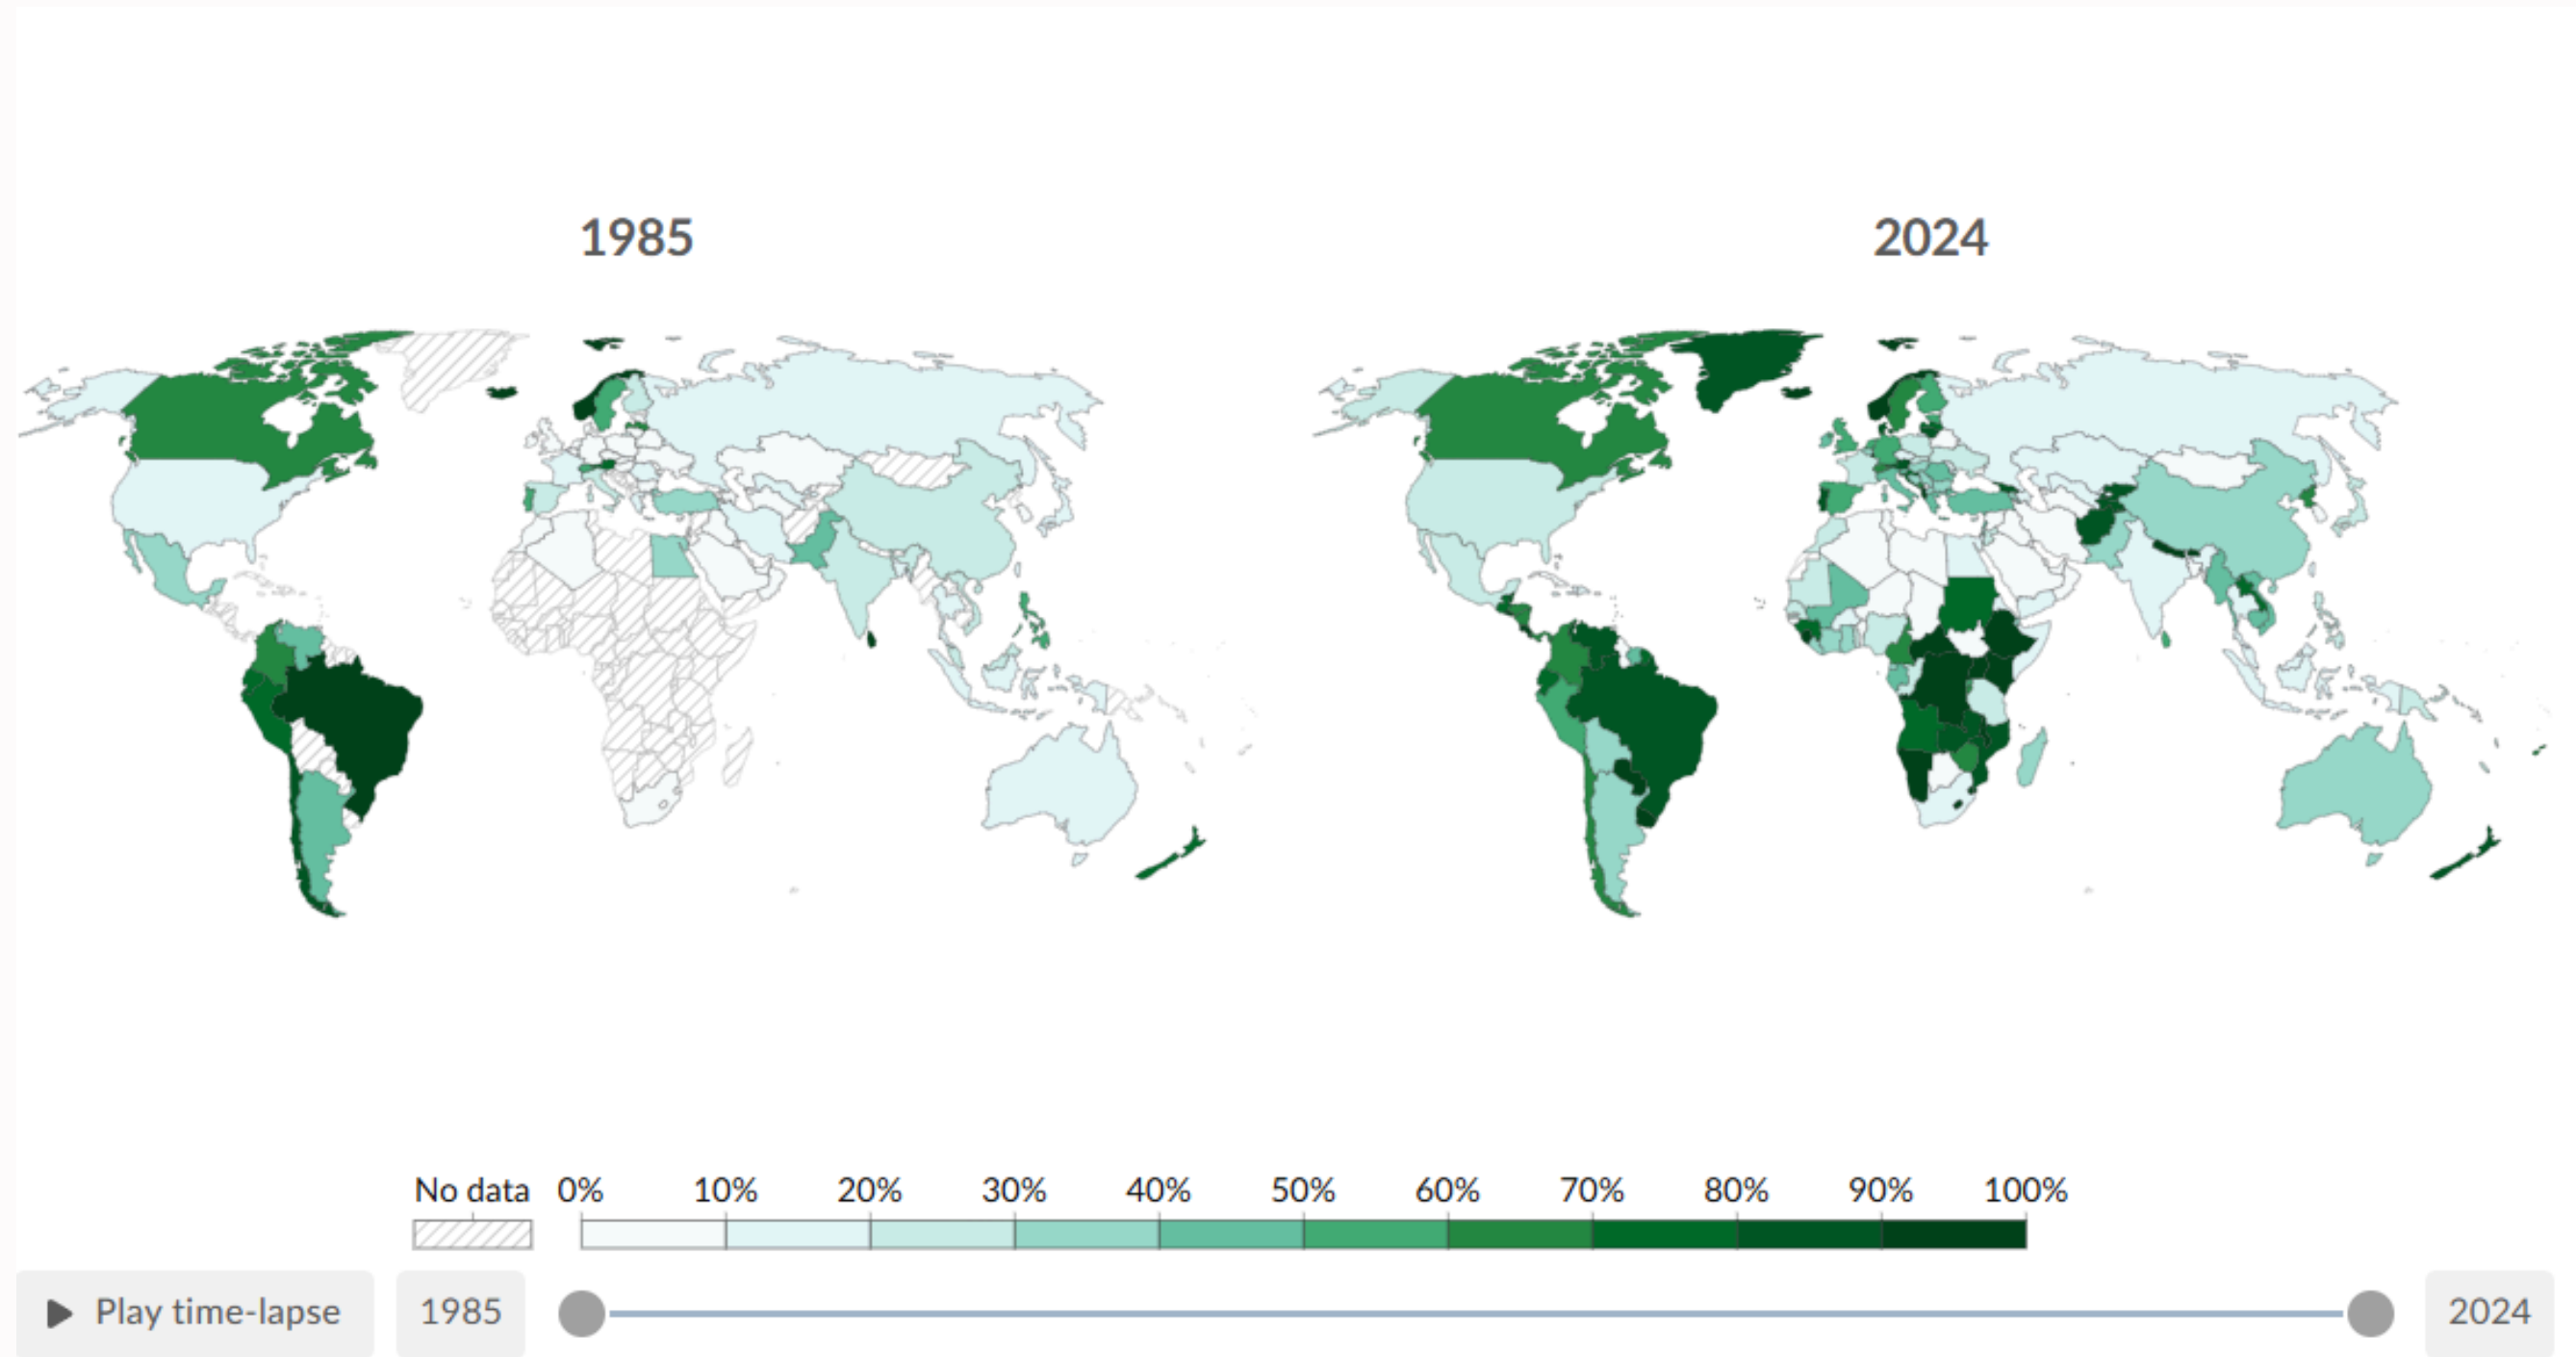

World Map with Dynamic Coloring

Filtering based on continent, country, city(?)

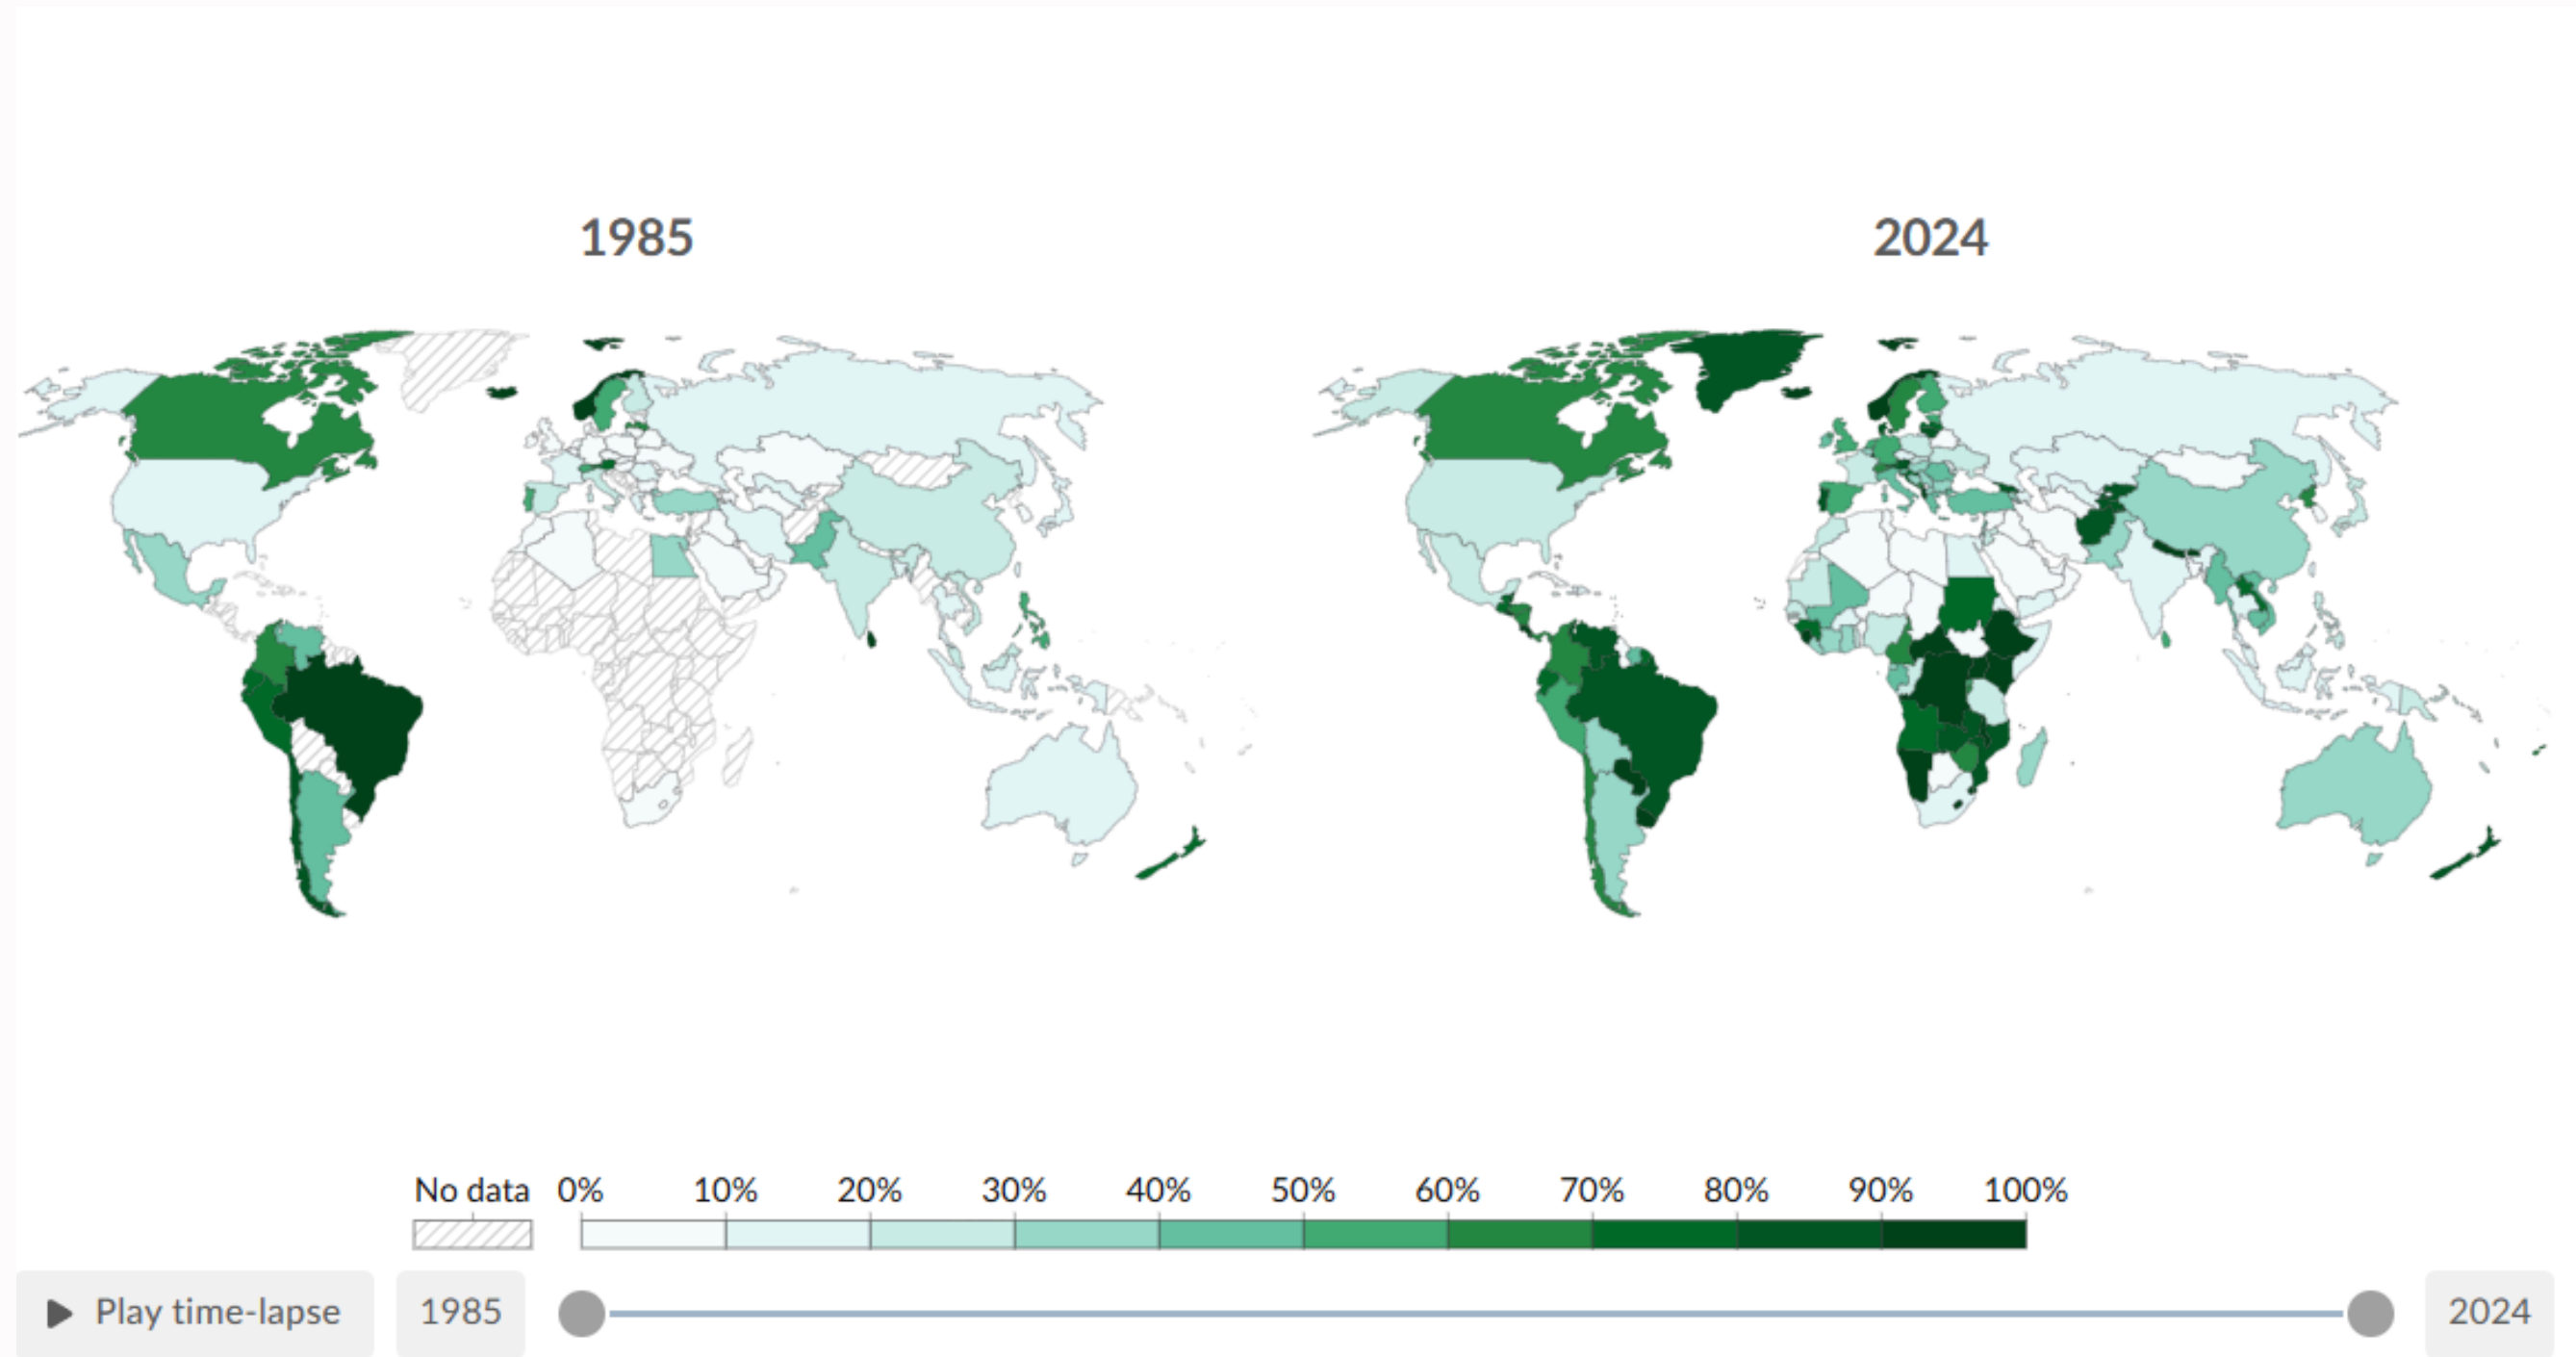

Which Visualizations?

Interactive Timeline

Which Visualizations?

Comparison View

Which Visualizations?

Small Window
